Muse Career

Description

This app fetches a list of jobs available nearby your area.

Intended User

People who are looking for jobs.

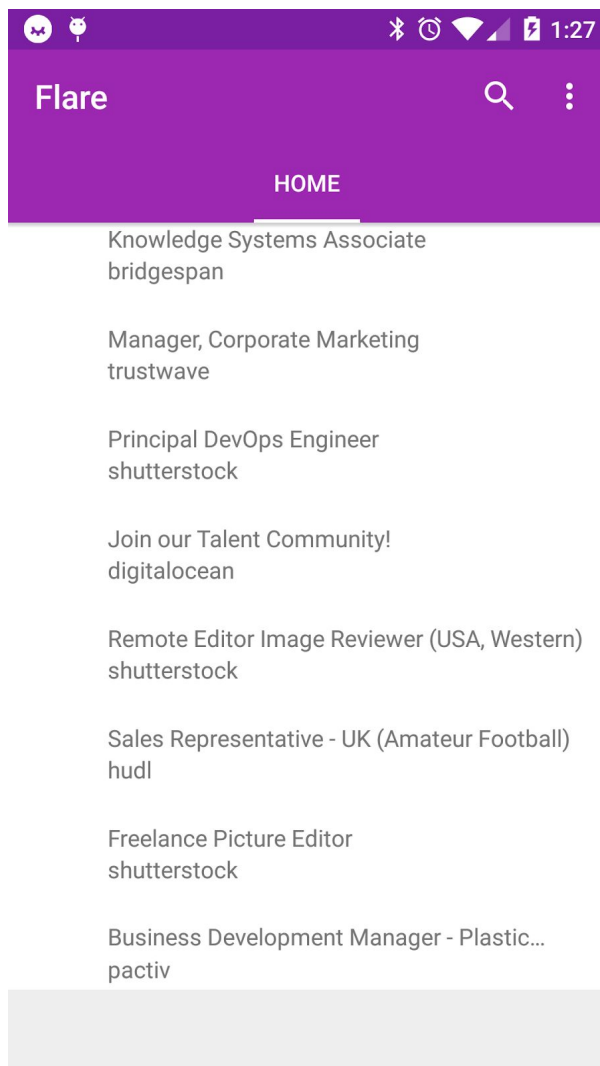

Features

- Shows the list of jobs
- Shows the jobs that are in your area.

User Interface Mocks

These can be created by hand (take a photo of your drawings and insert them in this flow), or using a program like Photoshop or Balsamiq.

Screen 2

N/A

Key Considerations

How will your app handle data persistence?

I will build a Content Provider with Contract.

Describe any corner cases in the UX.

If they hit the back button, they go back to the origina page.

Describe any libraries you'll be using and share your reasoning for including them.

I will use Retrofit to fetch from the server.

Next Steps: Required Tasks

This is the section where you can take the main features of your app (declared above) and decompose them into tangible technical tasks that you can complete incrementally until you have a finished app.

Task 1: Project Setup

Set up the basic structure of the app and fetch data from the background

- Use Retrofit to set up the fetch process

Task 2: Implement UI for Each Activity and Fragment

Utilize the data fetched.

- Build UI for MainActivity

Task 3: Your Next Task

Add Google Play Services

- Implement Google Play Services for AdMob
- Implement Google Play Services for Location

Submission Instructions

1. After you've completed all the sections, download this document as a PDF [File → Download as PDF]
2. Create a new GitHub repo for the capstone. Name it "**Capstone Project**"
3. Add this document to your repo. Make sure it's named "**Capstone_Stage1.pdf**"
